TEACHING LEARNING PROCESS

2.3.1 STUDENT CENTRIC METHODS

Shri Sharda Bhavan Education Societies, Nanded Pharmacy College has always placed a priority on the holistic development of its students. To accomplish this, the institute employs a variety of student-centric approaches, including experiential learning, participatory learning, and problem-solving methodologies. Student-centric approaches make the teaching learning process enjoyable for both students and teachers. It boosts students' engagement and enthusiasm for learning.

Experiential Learning Methods:

We believe experiential learning as "the process of learning through doing." As a scientific professional programme, the pharmacy programme necessitates learning through experience. To meet programme requirements, we at Nanded Pharmacy College (NPC), Nanded, utilize the following Experiential Learning methods.

- I. We organize visits to various industrial manufacturing plants to give insights to the students about good manufacturing practices and advances in the technologies
- II. Institution organizes regular guest lectures by experts.
- III. Our Institute facilitates students to undertake industrial training/internship to gain the knowledge about latest advancements in industry by practical experience.
- IV. Regular laboratory experiments to provide learning through doing.

2. Participatory Teaching-Learning Methods:

Participatory Learning encourages students to share, investigate, and expand their knowledge in order to plan, monitor, and evaluate professional activities. We at Nanded Pharmacy College strive to make our students technically sound by utilising the following Participatory Learning Methods.

- I. Conferences/Workshop/Seminar/Poster or paper presentation
- II. Participation in national level competitions, Avishkar/Anvension
- III. Model Making Competition

III. ICT Enabled Teaching methods

Information and Communication Technology (ICT) tools have revolutionized the way education is delivered and accessed. Here are some examples of ICT tools in education:

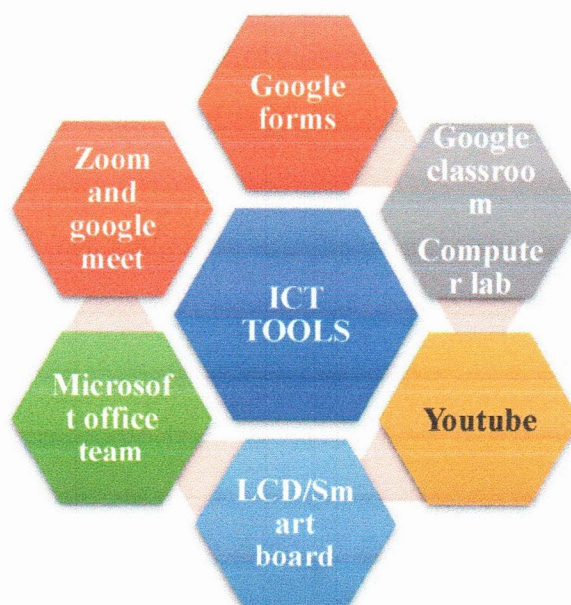

Multimedia Tools: Multimedia tools like videos, podcasts, and animations can be used to create engaging content that can help students learn complex concepts in a more simplified way.

Online Collaboration Tools: Online collaboration tools like Google Docs, Microsoft Teams, allow students and teachers to work together on projects and assignments, share ideas and feedback, and communicate in real-time.

Social Media: Social media platforms like YouTube, SlideShare can be used to share educational content, connect with other educators and students, and build online communities around specific topics or subjects. These are just a few examples of the many ICT tools available in education.

By integrating these tools into their teaching and learning processes, educators can create more engaging and effective learning experiences for their students.

We Nanded Pharmacy College extensively using the above ICT as an interactive tool to facilitate modern educational system.

This is to certify that Miss Vinaya Bhagwat. **B. Pharm** student of Shree Sharda Bhavan Education Society's Nanded Pharmacy College dist. Nanded, has undergone in plant training for the period **12th may 2019 to 15th june, 2019.**

He has completed his training from **RMPM Stores, Packing, and Quality Control Department.**

His attendance was found to be satisfactory.

We wish his all the best in his future endeavors.

Dhonde Smeha Shivraj (Name of Student Pharmacist)

of SSBE Society's Nanded Pharmacy College, Nanded as a trainee and I agree to give him/her training facilities in my organization so that during his/her training he/she may acquire:-

1. Working knowledge of keeping of records required by various Acts affecting the profession of Pharmacy; and
2. Practical experience in
 - (a) The manipulation of pharmaceutical apparatus in common use;
 - (b) The reading, translation and copying of prescriptions including the checking of doses;
 - (c) The dispensing of prescriptions illustrating the commoner methods of administering medicaments; and
 - (d) The storage of drugs and medicinal preparations.

I also agree that a Registered Pharmacists shall be assigned for his/her guidance.

Gurgaon, India - 122018

Date - 18/12/2020

TO WHOM IT MAY CONCERN

This is to certify that Sayeda Zoha Sadaf, a student of SSBES's Nanded Pharmacy College, Nanded, was an outstanding performer of Internshala's campus ambassador program - Internshala Student Partner (ISP) 19 during the period of September 2020 to November 2020. Sayeda stood 16 out of 40,400 students selected from different colleges across India.

During this period, Sayeda promoted Internshala and its products successfully and showed genuine sincerity and willingness to learn while taking on new assignments and challenges. At Internshala, we consider ISPs, our biggest strength when it comes to educating college students across the world about the power of internships and online trainings.

We believe Sayeda would be a great addition to any organization, adding value to fellow colleagues by participating in discussions, and providing a unique perspective on a wide variety of issues.

We appreciate the effort put in and wish Sayeda all the best for future endeavors.

Kind regards,

CEO - Internshala

Sample Copy of Lab Manual

EXPERIMENT NO: - 1

DATE: 12/1/19

Aim: - Introduction to experimental pharmacology.

Reference: -

Pharmacology is the science which deals with the study of drugs. The word 'pharmacology' is derived from the Greek words Pharmakon (a drug or poison) and logos (discourse). It broadly covers the information about the history, source, physiochemical properties, physiological actions, mechanism of action, absorption, distribution, metabolism, excretion and therapeutic uses of drugs. Drugs, again, are chemical substances used for the purpose of diagnosis, prevention, relief or cure of a disease in man or animals. The word, 'drug' is derived from the French word 'drogue' meaning herb.

Experimental pharmacology is relatively the youngest branch of basic medical sciences. Although this discipline was started in Europe and England in nineteenth century it has been developed to its present status only during the last few decades or so. Rudolf Buchheim founded the first experimental pharmacology laboratory in his own house in 1849 in Germany. Oswald Schmiedberg, Serturner, Magendie, John Abel, Arthur Cushney, J. H. Burn and Gaddum made significant contributions for the development of experimental pharmacology during last one hundred years.

In India Sir Ram Nath Chopra made the beginning in pharmacological research of traditional drugs. The other outstanding pharmacologists who significantly contributed to the growth of this discipline in India are R. B. Arora, M. N. Ghosh, U. K. Sheth, P. C. Dandiya and K. P. Bhargava. Today the experimental pharmacology has tremendously drifted from the conventional approach to molecular and biochemical aspects. The advancements in the field of electrophysiology, biochemistry, molecular biology and analytical chemistry have enriched and broadened the horizons of experimental pharmacology.

The main aims of experimental pharmacology are to

- (1) find out a therapeutic agent suitable for human use;
- (2) study the toxicity of a drug; and
- (3) study the mechanism and site of action of drugs.

Ref. No. NPC / B. Pharm/

Date:

Since experimental pharmacology involves the discovery of new drugs or to study the actions of existing drugs it is done in two main stages.

- (i) preclinical experimental pharmacology which involves the identification and optimization of novel chemical lead structures and testing on animals and animal tissues or organs for their biological actions, and
- (ii) the second stage, clinical pharmacology where testing of drugs is done on human volunteers and patients for assessing the pharmacokinetics, safety and efficacy in humans.

Since pharmacists come in contact with drugs at every stage of its development, right from synthesis, pharmacological testing, formulation of drugs to dispensing, it is quite apparent that a student of pharmacy to have an adequate exposure and background to experimental pharmacology.

Result:- Introduction to experimental pharmacology was studied.

Date:

Experiment No. 19

Date: 07/03/22

Aim: To study the muscle relaxant property of drug (Diazepam) in Rat using Rota rod Apparatus.

Principle:

One of the important pharmacological actions of anti anxiety agents of Benzodiazepine and centrally acting d2 against class of drugs are muscle relaxing property. The skeletal muscle relaxations together with taming or calming effect these agents reduce anxiety and tension. The loss of muscle grip is an indication of muscle relaxation. This effect can be easily studied in animals using inclined plane or rotating rods.

The difference in the fall off time from the rotating rod between the control and drug treated animal is taken on an index of muscle relaxations. The angle of the slope of the inclined plane or the rate of rotation of the rod should be adjusted such that a normal mouse can stay on the plane or on the rod for an appreciable period (3-5 min) of time.

Requirements:

Animals: - Rat

Drug: - Diazepam

Equipment: - Rota Rod apparatus (Techno)

Procedure:

1. The mice were weighed and numbered.
2. The animals were placed one by one on the rotarod.
3. Turn on the Rota Rod. Select an appropriate speed (20-25 rpm is ideal)
4. The animals were trained for 3 hrs in a day with a gap of 1hr in between and was trained 10 mins on rotarod.
5. All the drugs were administered by intra peritoneal route by using 26 G needle.
6. Injected Diazepam (3, 4, 5 mg/kg) to all the animals. After 30- minutes repeat the experiment.
7. Note down the fall of time.
Compared the fall of time of animals before and after treatment.

Ref. No. NPC / B. Pharm/

Date:

Conclusion:

The present study was carried out to compare the muscle relaxant property of Diazepam given in different concentrations is experimental model. The experimental model is rotarod test in Albino mice. The Diazepam and were given in concentration of drug increases, the muscle relaxant property is also increase when assesses by rotarod.

Thus it was found that Diazepam Demonstrated muscle relaxant property but produced less muscle relaxant property as compared to Diazepam. Hence diazepam is considered to have maximum muscle relaxant property. This may due to its high lipid solubility.

Result: Reductⁿ in fall off time of the animal indicate the muscle relaxant property of diazepam.

REPORT

As a part of College Activities, The Institutional Research innovation committee of Nanded Pharmacy College had organized Model making competition on 25th sep 2019 at 04.30p.m. to 06.00 p.m. This competition was conducted in order to engage students to show their creativity and also to give wings to their imagination and thoughts. The competition was all about the enhancement of the students.

The topic assigned to the students was their own choice. Ms. R.M.Dhane and Mr.S.K.Sarje was the judge for this competition. Each and every student did a commendable job and raised the level of competition. Winners were declared by the judge based on the creativity and effectiveness of the theme.

List of Students Undertaking Project Work

(A. Y. 2021-2022)-

Class: Final Year B Pharm

Sr. No.	Name of Students	Project Title
1.	Ametwad Kavita Balaji	Formulation Of Cold Cream and Performing Its Evaluation Test
2.	Bagal Yash Satish	Pharma Franchise Business
3.	Bende Shirish Digambar	Phytochemical And Pharmacological Evaluation <i>Syzigium Cumini</i> Seed Extract For Anxiolytic Activity
4.	Chambalwar Pratiksha S.	UV Spectrophotometry Quantitation of Paracetamol From Its Tablet Dosage Form & Acidic Hydrolytic Degradation Study
5.	Dhande Shubham Balaji	In Vitro Anti Bacterial Activity of Fruit Extract of <i>Emblica Officinalis</i>
6.	Dhanshetti Rutuja Gopal	Formulation And Evaluation of Herbal Mouthwash
7.	Dolarkar Sakshi Anandrao	Extraction And TLC Characterization of Lycopene
8.	Gaikwad Vishwata Balaji	Formulation And Evaluation of Antimicrobial Herabal Soap of <i>Azadirachta Indica</i>
9.	Gandalwar Priyanka G.	Formulation Of Herbal Mascara And Determine The Effect of Synthetic Mascara On Eyelashes
10.	Hambarde Anil Sadashivrao	Extraction Of Potash Alum From Biomedical Waste For The Preparation Of Pharmaceuticals
11.	Holkar Sandesh Prakash	Phytochemical And Pharmacological Evaluation of <i>Aegle Marmelous</i> Fruit Extract of Memory Enhancing Activity
12.	Jain Yugant Prashantkumar	Formulation And Evaluation Of Antimicrobial Polyherbal Paper Soap
13.	Jaiswal Megha Madanlal	Formulation of Herbal Mascara And Determine The Effect of Synthetic Mascara On Eyelashes
14.	Jantine Shubham Parshuram	Analysis of Separated Tea Polyphenols
15.	Kadam Dattarao Manikrao	Phytochemical And Pharmacological Evaluation of <i>Hibiscus Rosa Senensis</i> Extract For Anxiolytic
16.	Kadam Mahesh Tulshiram	UV Spectrophotometry Quantitation of paracetamol From Its Tablet Dosage Form & Thermal Degradation Study
17.	Kadam Meena Keshav	Preliminary Phytochemical Physioconemical And Antibacterial Evaluation of <i>Butea Monosperma</i> Flower Extract
18.	Kalyane Shital Purbhaji	Formulation And Evaluation of Herbal Mouthwash

ABSTRACT

Objective: The objective of this study was to carry out phytochemical and pharmacognostic and quantitative evaluation of leaves of *Pongamia pinnata* L. (Fabacea). **Method:** The present study provides pharmacognostic, phytochemical and quantitative details of the leaves of *P. pinnata*. **Results:** The macroscopic study showed that the leaf was ovate or elliptic with smooth margins, short petiole, alternate imparipinnate, hairless, acuminate at apex, rounded to cuneate at base and slightly thickened. Microscopic study revealed collateral, closed vascular bundles, trichomes, paracytic stomata, xylem vessels and prismatic calcium oxalate crystals. Qualitative Phytochemical screening showed the presence of alkaloids, glycosides, carbohydrates, steroids and flavonoids and phenolic compounds in both the extracts. Total Poly phenol content & total flavonoid content was determined by Folin Ciocaltue & Aluminium trichloride method

Abstract -The stem bark of *Limonia acidissima* Linn. were collected, processed and standardized as per official methods. Two extracts of *Limonia acidissima* Linn. stem bark (ethanol & acetone) were studied to detect the chemical compounds present, to evaluate acute oral toxicity & anti-anxiety activity. Phytochemical testing of extracts revealed presence of glycosides, flavonoids, carbohydrates etc. the total phenolic and flavonoid content of plant extracts was expressed as gallic acid equivalents and as rutin equivalents respectively. The result of acute oral toxicity studies of plant extracts as per standard references revealed median lethal dose (LD₅₀) could be greater than 2000 mg/kg body weight in rats. Accordingly safe experimental dose was calculated as 100 and 200 mg/kg. From the acute toxicity studies as per reference standard and on the basis of literature survey for acetone and ethanol extract of *Limonia acidissima* Linn. stem bark maximum and minimum therapeutic experimental safe dose was found to be 200 mg/kg and 100 mg/kg respectively. The evaluation of *in-vitro* anti-anxiety activity in rats was done using various experimental models. Light-dark test and Elevated plus Maze test were performed for the evaluation of anti-anxiety activity in the ethanol test rats showed the increased anti-anxiety activity at a concentration of 200mg/kg and 100mg/kg compared acetone and control group.

Key words: Anti-anxiety, *Limonia acidissima* Linn., elevated plus maze, light & dark

ABSTRACT

Memory is the ability of an individual to record sensory stimuli & retain them over short or long periods of time & recall the same at a later date when needed. Short and long term memory loss may result from deteriorating cerebral mechanisms due to different causes having impact on the quality of life. Memory enhancer can improve thinking, memory, and alertness in people with Alzheimer's disease that affect the mind. The Leaves of *Pongamia pinnata pierre* (Linn) belongs to the family Fabaceae is used as a digestive, laxative, anti-helminthic and are good for diarrhea, leprosy, dyspepsia and cough. Traditionally it is also used as Neuroprotective as it contains Chalcone derivatives.

Memory refers to retaining and recalling information over a period of time, depending upon the nature of cognitive task you are required to perform. The present study designed to assess the memory enhancing potential of *Pongamia pinnata* leaves extracts in wistar albino rats. In this study the two models has been selected under which in radial arm maze model in rats is used to evaluate working and reference memory errors and the Morris water maze is used to

Keywords: *Vigna radiata* (V.R.), Ethyl acetate (EA.) and Ethanol (Eth.) extract, Phytochemical screening, Antioxidant activity, Hepatoprotective activity

ABSTRACT

Medicinal plants have always been the principle sources of medicines worldwide. Human beings have used these as medicines from the very beginning of time. India contains a very rich traditional medicinal plant wealth and harbors unique plant and animal communities. The objective of the study was undertaken to investigate the hepatoprotective activity of Ethyl acetate & Ethanol extract of *Vigna radiata* stem bark which is an important medicinal plant in Indian folk. In the present study, the stem bark of *Vigna radiata* which belongs to family Fabaceae were chosen because various parts of the plant possess several bioactivities & is used in traditional medicinal system. The antioxidant activity of the extracts was done by using DPPH method. The results showed that ethyl acetate extract and ethanol extract at 125µg/ml concentration showed the significant antioxidant effect as compared with ascorbic acid as standard. The *in-vivo* hepatoprotective activity of VREA and VR Eth extract were estimated by using carbon tetrachloride induced hepatotoxicity model. The degree of protection was estimated by measuring levels of biochemical markers like SGOT, SGPT, Total Bilirubin and Total Protein. The histopathological study was also carried out and compared with carbon tetrachloride treated group. **Results:** The interpretation of results were done by subjecting the data to statistical analysis using mean ± S.E.M. The VREth extract at dose of 200mg/kg shows promising hepatoprotective effect than VREA extract. The VREth extract of plant shows significant antioxidant activity at the concentration of 125µg/ml than VREA extract at the concentration of 125µg/ml. **Conclusion:** The results suggest that the stem of *Vigna radiata* stem bark possess potential antioxidant and hepatoprotective activity.

ABSTRACT

Depression is considered as an affective disorder characterized primarily by change of mood. The study is aimed to comparative evaluation of *Tabernaemontana divaricata* leaves ethyl acetate (TDEA) and methanol (TDME) extracts for antidepressant activity by using wistar rats. The plant *Tabernaemontana divaricata* belonging to family Apocynaceae is used to treat various diseases like diarrhea, athralgia, asthma, epilepsy, aphrodisiac, leprosy, paralysis, piles etc. It is also traditionally claimed as antihypertensive, anthelmintic, hair growth promoter, tonic to the brain, liver, spleen etc. In the present study Despair swim test is used as model to induce depression in wistar rats. The TDEA at doses (100 mg/kg, 200 mg/kg) and TDME at dose (100 mg/kg, 200 mg/kg) show significant decrease in immobility time in sec on day 15 as compared to day 1 and 8. Methanol extract (200 mg/kg) on day 15 shows equivalent activity compared

ABSTRACT:

Medicinal plants have always been the principle sources of medicine worldwide. Human beings have used those as medicine from the very beginning of time. India sustains a very rich traditional medicinal plant wealth and inherits unique plant and animal communities. The objective of the study was undertaken to investigate the hepatoprotective activity of Ethyl Acetate & Methanolic extract of *Cyamopsis tetragonoloba* L. pods which is an important medicinal plant in Indian folk.

In the present study the pods of *Cyamopsis tetragonoloba* which belongs to family Fabaceae were chosen because various parts of the plant possesses several bioactivities & is used in traditional medicinal system.

The pods of *Cyamopsis tetragonoloba* L. were collected, processed & standardized as per official methods. Two extracts of *Cyamopsis tetragonoloba* L. pods (Ethyl Acetate and Methanolic) were studied to detect the chemical compounds present, to evaluate acute oral toxicity & hepatoprotective activity. Qualitative phytochemical screening revealed the presence of flavonoid, p-coumarin, Saponins, tannin and triterpenes. Total Polyphenol content & total flavonoid content was determined by Folin Ciocalteu & Aluminium trichloride method respectively by using UV-Visible spectrophotometer. Physical parameters like solubility, ash values, LOD, extractive value etc. has been studied.

The antioxidant activity of the extracts was done by using DPPH method. The results showed that Ethyl Acetate extract and Methanolic extract at 125µg/ml concentration showed the significant antioxidant effect as compared with ascorbic acid as standard. The *In-vivo* hepatoprotective activity of C.T.EA and C.T.Mth extracts were estimated by using carbon tetrachloride induced hepatotoxicity model. The degree of protection was estimated by measuring levels of biochemical markers like SGOT, SGPT, Total Bilirubin and Total Protein. The histopathological study was also carried out and compared with carbon tetrachloride treated group.

Results: The interpretations of results were done by subjecting the data to statistical analysis using mean \pm S.E.M. The C.T.Mth extract at dose of 200mg/kg shows promising Hepatoprotective effect than C.T.EA extract. The C.T.Mth extract of plant shows significant antioxidant activity at the concentration of 125µg/ml than C.T.EA extract at the concentration of 125µg/ml.

Conclusion: The results suggest that the pods of *Cyamopsis tetragonoloba* L. possess potential antioxidant and hepatoprotective activity.

Keywords: *Cyamopsis tetragonoloba* L. (C.T.) Ethyl Acetate (EA) and Methanolic (Mth.) extracts, Phytochemical screening, Antioxidant activity, Hepatoprotective activity.

ABSTRACT

The present study reports physicochemical characterization, antidepressant activity of extracts from *Ruellia tuberosa* Stem Bark collected from local region of Nanded, Maharashtra, India. Different physical parameters like ash values, extractive value, Loss on drying, solubility etc were evaluated for powdered drug. The extracts were obtained from Soxhlet method by using water and methanol as solvents for extraction and subjected for preliminary physicochemical evaluation and antioxidant studies. Total phenolic and flavonoids content were also analyzed. The presence of primary and secondary metabolites such as carbohydrate, proteins, alkaloids, phenolic compounds, saponins was confirmed through preliminary phyto-chemical analysis. DPPH free radical scavenging assays showed strong antioxidant activities with increase in concentration of Ethyl acetate and methanol leaf extracts. Maximum percentage inhibition i.e. 80.97% was shown by methanolic extract at concentration of 150 µg/ml and was compared with Ascorbic acid as reference standard. The *In-Vivo* antidepressant activity of *Ruellia tuberosa* Stem Bark was evaluated by Despair Swim Test model in rats using Imipramine as a standard. Both the extracts at 200mg/kg Concentration showed significant to highly significant number of entries & time spent in P zone (from P < 0.05 to P < 0.001). The result suggest that *Ruellia tuberosa* Stem Bark extracts possess antidepressant activity and this might be due to flavonoids. Phenolic compound, steroid and proteins present in extract.

Keywords: *Ruellia Tuberosa* Stem Bark, Ethyl acetate and Methanolic extract, Phytochemical screening, Antioxidant effect, antidepressant activity.

ABSTRACT

The presence study aimed to evaluate the Hepatoprotective effect of *Bougainvillea spectabilis* stems extract against liver injury induced by carbon tetrachloride (CCl₄). Both male and female wistar albino rats were used, rats were injected i.p. with CCl₄ (1ml/kg) mixed in liquid paraffin in portion (1:1), three times in a seven days and treated orally with *Bougainvillea spectabilis* (100 mg/kg and 200 mg/kg) stems extract daily for seven days and compared with a group of rats injected i.p. with CCl₄ (1ml/kg) mixed in liquid paraffin in portion (1:1), three times in a seven days. *Bougainvillea spectabilis* plant belonging to family Nyctaginaceae used in various diseases like Hepatitis.(Leaves),

Diarrhea, Inflammation, Stomach acidity, Cough, sore throat and other respiratory diseases, Leucorrhoea, Ulcer, Microbial infection, Diabetes, Hyperlipidemia, Cancer, It have anti-fertility property. Carbon tetrachloride caused a significant elevation in enzyme levels such as

Power point presentations:

All the faculty of NPC use Power point presentation while delivering the lecture. Faculty members typically create PowerPoint presentations using software such as Microsoft PowerPoint, Google Slides. These tools provide a variety of features for creating and editing slides, including text boxes, images, charts, graphs, and multimedia elements such as video and audio. Faculty also include Animations, video hyperlink, illustrations, flowcharts and tables etc to enhance students' attention and concentration while teaching.

DELNET/MEM/IM-9867/mhNPCDC/2023

Sub : Membership of DELNET

Dear Dr. Ghaware,

We are glad to inform you that the "Nanded Pharmacy College (Degree College), Nanded, Maharashtra" has been admitted as an Institutional Member of DELNET. The membership number is **IM-9867**. I am herewith enclosing the receipt no. 74874 dated 6/5/2023 for ₹19,470/- received through NEFT dated 4/5/2023 towards the Admission Fee & Annual Institutional Membership Fee for the period 4-5-2023 to 3-5-2024 along with a duly signed copy of the MOU for your office records. **I would like to mention that the next annual membership renewal will be due by May 3, 2024.**

You are requested to access DELNET databases through the World Wide Web using the following procedure:

Web Address: <http://www.delnet.in>

Click to "New Discovery Portal". Since the IP address provided by you is registered with us, the users will be able to open the landing page without login prompt.

We are also glad to provide the following login & password for accessing DELNET remotely:

Login	: mhnpcdc
Password	: npc9867

Kindly note your Inter Library Loan (ILL for Books) Password is "mhnpcdcib" to be used while registering a request. You are also welcome to send us the bibliographical references at sangs@delnet.res.nic.in, sangskaul2003@yahoo.co.in for the resources needed by you. We will try our best to locate these resources. We will try our best to locate these resources. We would like to inform you that DELNET has launched WERVIEW Youtube channel which contains a large number of video recordings of Webinars organised by DELNET including sessions on DELNET resources and services. The link is available at the Discovery Portal. We would further like to inform you that Usage Report can be generated through "USAGE STATISTICS" link which appears at the top side of the landing page of the discovery portal. Kindly use the password as **9867***1992** to download the pdf, containing usage report of your college.

We would like to mention that DELNET provides access to more than 33 crore catalogue records of books, journals, articles, etc. through Discovery Portal and also more than one crore and fifty lakh full-text e-books, e-journals & e-articles through Knowledge Gainer Portal. We are pleased to inform you that DELNET has also recently launched VISO Portal which contains Video Recordings of Lectures on varied subjects. We request you to kindly contribute the video lectures of the Faculty Members of your Institution. Kindly contact us for further assistance. DELNET also provides Delplus software free of charge for library automation purposes. DELNET Guest House facility at New Delhi can also be availed by member-libraries on payment basis.

We would also like to mention that DELNET offers DrillBit software for plagiarism detection for an annual subscription of Rs.48,000 (inclusive of GST) for 300 documents checking.

We hope that the students and faculty of your college will get benefited by using the DELNET databases and services. We would also like to inform you that DELNET shall be glad to organise an one hour webinar on DELNET Networked Resources and Services at a mutually convenient date and time for "Nanded Pharmacy College (Degree College), Nanded, Maharashtra". It will help in the effective utilisation of DELNET resources and services. **We would like to request you to kindly ensure that this membership letter containing login password may not be uploaded on any online Internet Platform including the Institutional website except its submission to accreditation bodies, if so required.**

Do kindly let us know if you require any further assistance.

With kind regards,

Yours sincerely,

Sangeeta Kaul

Use of Online Teaching During Covid Pandemic:

Online teaching facilities such as video conferencing tools, learning management systems, and digital course content platforms were extensively used to deliver lectures, conduct assessments, and facilitate group discussions. These tools enabled students and teachers to communicate in real-time and interact with each other as if they were in a physical classroom.

Faculty used various online teaching methods such as Zoom meeting app. Google meet to conduct online classes Google classrooms were created to communicate and supply notes or e content to the students. Google forms, Testmoz were used to conduct internal and external examination during the covid pandemic.
